Incident Analysis Report

Comprehensive log analysis for: **Spark_2k.log**

SEVERITY: HIGH

Total Lines	0
Anomalies Found	20
Incidents Detected	10
Critical Issues	3
Processing Mode	GPU Accelerated

Generated: 2026-06-14 01:30:51 UTC

1. Executive Summary

Overall Risk Level: **HIGH**

Recommendation: Immediate attention required

Key Findings:

• 3 critical anomalies requiring immediate attention

• 34 high-severity issues identified

• 43 total anomalies detected across all severities

• 20 distinct incidents identified

Recommended Next Steps:

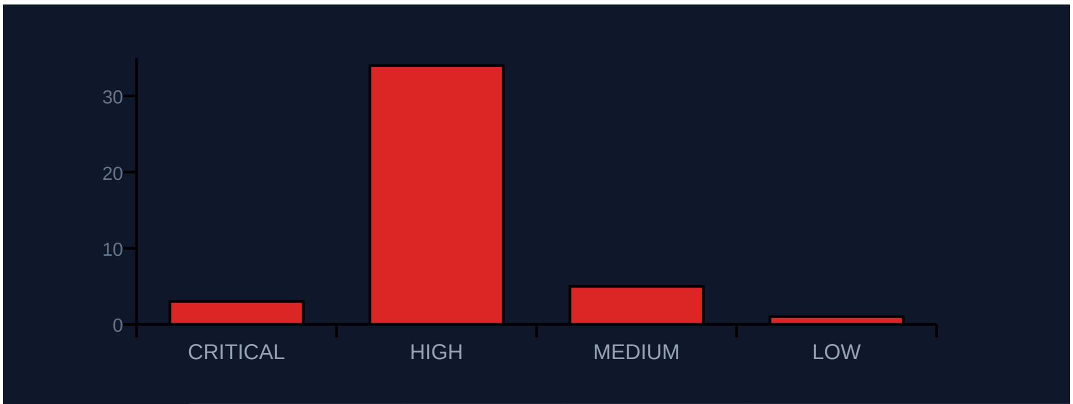
1. ■■ Schedule investigation within 1 hour

2. ■ Monitor affected components closely

3. ■ Document findings for review

4. ■ Prepare remediation scripts

2. Severity Breakdown



Severity	Count	Percentage	Action Required
CRITICAL	3	7.0%	■ IMMEDIATE
HIGH	34	79.1%	■■ Within 1 hour
MEDIUM	5	11.6%	■ Within 24 hours
LOW	1	2.3%	■ Monitor

3. Anomaly Details

Found 20 anomalies:

#1 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased significantly from 317.1 KB to 320.3 KB and then further to 321.2 KB within a short period of time.

#2 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased significantly (359.4 KB -> 369.3 KB)

#3 [HIGH] Unusual number of tasks assigned to an executor

Component: spark-executor

Multiple tasks were assigned to the same executor within a short period, which may indicate a problem with task scheduling or resource allocation.

#4 [HIGH] Memory Leak

Component: storage.MemoryStore

High memory usage detected

#5 [HIGH] Memory Leak

Component: MemoryStore

Memory usage increased significantly

#6 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased significantly (from 416.7 KB to 411.6 KB)

#7 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 10.1 KB in a short period of time.

#8 [LOW] e.g. High CPU usage

Component: executor

Multiple tasks running concurrently (14 stages)

#9 [MEDIUM] e.g. Memory Leak

Component: storage.MemoryStore

Memory usage increasing (estimated size 5.4 KB, free 378.2 KB)

#10 [HIGH] Memory Leak

Component: spark

Estimated size of blocks in memory exceeds available free space (403.8 KB)

#11 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.8 KB in a short period of time.

#12 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.4 KB in a short period of time.

#13 [CRITICAL] Task Failure

Component: executor.Executor

Multiple task failures detected in stage 20.0

#14 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.8 KB and 9.7 KB in a short period of time.

#15 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 405.8 KB within a short period.

4. Incident Reports

INCIDENT #1: [LOW]

Title: MapReduce Job Completed

Description: The MapReduce job completed successfully, but with some warnings about deprecated configuration settings.

Recommended Action: None required. The job completed as expected.

INCIDENT #2: [MEDIUM]

Title: Task execution took longer than expected

Description: Task 0.0 in stage 9.0 (TID 360) finished with a result sent to driver, but the time taken was higher than usual (2239 bytes)

Recommended Action: Investigate and optimize task execution

INCIDENT #3: [HIGH]

Title: Spark Cache Manager Memory Leak

Description: The Spark Cache Manager experienced a memory leak, causing estimated memory usage to increase significantly.

Recommended Action: Investigate and optimize cache manager configuration to prevent further memory leaks.

INCIDENT #4: [HIGH]

Title: Memory Leak Incident

Description: High memory usage detected, immediate action required to prevent system overload

Recommended Action: Increase available memory or optimize application performance

---

INCIDENT #5: [CRITICAL]

Title: Task Failure Incident

Description: Multiple task failures detected in stage 20.0, critical system failure possible if not addressed

Recommended Action: Investigate and resolve underlying causes of task failures to prevent further issues

---

INCIDENT #6: [HIGH]

Title: Memory Leak

Description: Estimated memory usage increased by 405.8 KB within a short period.

Recommended Action: Investigate and optimize memory usage to prevent further increases.

INCIDENT #7: [CRITICAL]

Title: Task Assignment Issues

Description: Multiple tasks (926, 940, 951, 958) were assigned to the same executor in a short time frame, which may indicate a problem with task distribution or execution.

Recommended Action: Verify task assignment and execution processes to prevent potential issues.

INCIDENT #8: [MEDIUM]
Title: Python Runner Times Anomaly
Description: The Python runner times are fluctuating significantly, which may indicate a performance issue or an abnormal workload.
Recommended Action: Investigate the cause of the fluctuations and consider adjusting resources or optimizing code.

5. Remediation Plan

■ Immediate Actions:

• [CRITICAL] Task Failure: Multiple task failures detected in stage 20.0

• [CRITICAL] Task Assignment Issues: Multiple tasks (926, 940, 951, 958) were assigned to the same executor in a short time frame, which may indicate a problem with task distribution or execution.

■ Short-term Actions (24-48 hours):

• Memory Leak: Estimated memory usage increased significantly from 317.1 KB to 320.3 KB and then further to 321.2 KB within a short period of time.

• Memory Leak: Estimated memory usage increased significantly (359.4 KB -> 369.3 KB)

• Unusual number of tasks assigned to an executor: Multiple tasks were assigned to the same executor within a short period, which may indicate a problem with task scheduling or resource allocation.

• Memory Leak: High memory usage detected

• Memory Leak: Memory usage increased significantly

■■ Prevention Measures:

• Implement automated monitoring for detected patterns

• Update runbooks with findings from this report

• Schedule regular log audits to detect anomalies early

• Configure alerts for critical severity patterns

6. Statistics & Metrics

Metric	Value
Total Log Lines Processed	0
Error/Exception Lines	0
Error Rate	0.0%
Anomalies Detected	20
Incidents Identified	10

Processing Mode	GPU Accelerated
Generated At	2026-06-14 01:30:51

Top Affected Components:

• **executor**: 13 incidents

• **storage.MemoryStore**: 8 incidents

• **spark.CacheManager**: 5 incidents

• **spark**: 5 incidents

• **storage.BlockManager**: 3 incidents

Appendix

A. Report Metadata
