Incident Analysis Report

Comprehensive log analysis for: **Spark_2k.log**

SEVERITY: HIGH

■ **Total Lines**	0
■ **Anomalies Found**	20
■ **Incidents Detected**	10
■■ **Critical Issues**	3
■■ **Processing Mode**	GPU Accelerated

Generated: 2026-06-14 01:29:46 UTC

1. Executive Summary

Overall Risk Level: **HIGH**

Recommendation: Immediate attention required

Key Findings:

• 3 critical anomalies requiring immediate attention

• 38 high-severity issues identified

• 46 total anomalies detected across all severities

• 17 distinct incidents identified

Recommended Next Steps:

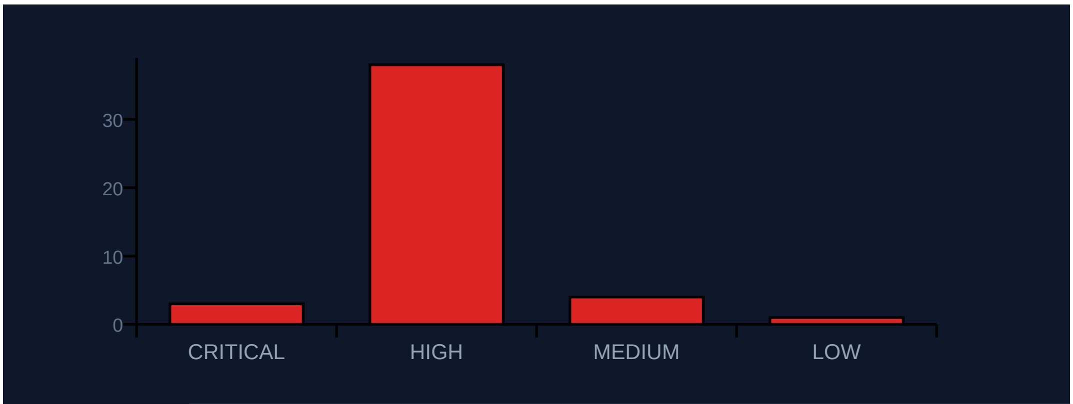
1. ■■ Schedule investigation within 1 hour

2. ■ Monitor affected components closely

3. ■ Document findings for review

4. ■ Prepare remediation scripts

2. Severity Breakdown



Severity	Count	Percentage	Action Required
CRITICAL	3	6.5%	■ IMMEDIATE
HIGH	38	82.6%	■■ Within 1 hour
MEDIUM	4	8.7%	■ Within 24 hours
LOW	1	2.2%	■ Monitor

3. Anomaly Details

Found 20 anomalies:

#1 [HIGH] Memory Leak

Component: spark

Repeated messages about MemoryStore started with capacity

#2 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased significantly (from 329.6 KB to 339.2 KB and then back down)

#3 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased by 5.6 KB in a short period of time.

#4 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage is increasing rapidly (320.3 KB -> 321.2 KB)

#5 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by approximately 5.7 KB and 10.1 KB within a short period of time.

#6 [LOW] High CPU usage

Component: Executor

Multiple tasks running concurrently, high CPU utilization

#7 [HIGH] Memory Leak

Component: spark

Estimated memory usage increased by 432.7 KB within a short period.

#8 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.8 KB and 9.6 KB in a short period of time.

#9 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased by 5.5 KB and 9.8 KB in a short period.

#10 [HIGH] Memory Leak

Component: MemoryStore

Estimated memory usage increased by 8.4 KB in the last minute.

#11 [HIGH] Memory Leak

Component: storage.MemoryStore

The memory usage is increasing rapidly, estimated size 5.4 KB, free 378.2 KB

#12 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased by 403.8 KB in a short period of time.

#13 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage is increasing rapidly (419.6 KB -> 379.9 KB)

#14 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 9.2 KB in a short period of time.

#15 [CRITICAL] Task Execution Issues

Component: executor.Executor

Multiple tasks failed to execute in stage 20.0 (TIDs: 807, 821, 833, 838, 839)

4. Incident Reports

INCIDENT #1: [LOW]

Title: Spark Executor Started

Description: Successful start of Spark executor on host mesos-slave-07

Recommended Action: None

INCIDENT #2: [MEDIUM]

Title: Task Assignment

Description: Multiple tasks assigned to the same executor (0, 1, 2, 3, 4)

Recommended Action: Monitor task execution and adjust resource allocation if necessary

---

INCIDENT #3: [HIGH]

Title: Memory Leak Incident

Description: Estimated memory usage increased significantly (from 419.6 KB to 419.7 KB). This may indicate a memory leak.

Recommended Action: Investigate and address the root cause of the memory leak

---

INCIDENT #4: [CRITICAL]

Title: Task Execution Issues Incident

Description: Multiple tasks failed to execute in stage 20.0 (TIDs: 807, 821, 833, 838, 839). This may indicate a problem with task execution or scheduling.

Recommended Action: Investigate and address the root cause of the task execution issues

---

INCIDENT #5: [HIGH]

Title: Memory Leak Incident

Description: A memory leak was detected, causing estimated memory usage to increase by 405.8 KB within a short period of time.

Recommended Action: Investigate and fix the root cause of the memory leak to prevent further issues.

INCIDENT #6: [CRITICAL]

Title: Task Assignment Issues Incident

Description: Multiple tasks were assigned to the same executor in a short period of time, indicating potential issues with task assignment or execution.

Recommended Action: Investigate and resolve the issue causing multiple tasks to be assigned to the same executor.

INCIDENT #7: [MEDIUM]

Title: Python Runner Times Anomaly

Description: The Python runner times showed unusual variations, with boot and init times ranging from -340 to 384.

Recommended Action: Investigate the cause of the variation in Python runner times.

INCIDENT #8: [HIGH]
Title: Task Assignment Anomaly
Description: Multiple tasks assigned to the same executor within a short period of time. This may indicate a performance bottleneck or an issue with task scheduling.
Recommended Action: Investigate and optimize task assignment logic

5. Remediation Plan

■ Immediate Actions:

• [CRITICAL] Task Execution Issues: Multiple tasks failed to execute in stage 20.0 (TIDs: 807, 821, 833, 838, 839)

• [CRITICAL] Task Assignment Issues: Multiple tasks (926, 940, 951, 958) were assigned to the same executor in a short period of time, indicating potential issues with task assignment or execution.

■ Short-term Actions (24-48 hours):

• Memory Leak: Repeated messages about MemoryStore started with capacity

• Memory Leak: Estimated memory usage increased significantly (from 329.6 KB to 339.2 KB and then back down)

• Memory Leak: Estimated memory usage increased by 5.6 KB in a short period of time.

• Memory Leak: Estimated memory usage is increasing rapidly (320.3 KB -> 321.2 KB)

• Memory Leak: Estimated memory usage increased by approximately 5.7 KB and 10.1 KB within a short period of time.

■■ Prevention Measures:

• Implement automated monitoring for detected patterns

• Update runbooks with findings from this report

• Schedule regular log audits to detect anomalies early

• Configure alerts for critical severity patterns

6. Statistics & Metrics

Metric	Value
Total Log Lines Processed	0
Error/Exception Lines	0
Error Rate	0.0%
Anomalies Detected	20
Incidents Identified	10

Processing Mode	GPU Accelerated
Generated At	2026-06-14 01:29:46

Top Affected Components:

• **executor**: 14 incidents

• **storage.MemoryStore**: 9 incidents

• **spark**: 8 incidents

• **spark.CacheManager**: 4 incidents

• **Executor**: 3 incidents

Appendix

A. Report Metadata
