Incident Analysis Report

Comprehensive log analysis for: **Android_2k.log**

SEVERITY: MEDIUM

■ Total Lines	0
■ Anomalies Found	17
■ Incidents Detected	10
■■ Critical Issues	0
■■ Processing Mode	GPU Accelerated

1. Executive Summary

Overall Risk Level: **MEDIUM**

Recommendation: Schedule review within 24h

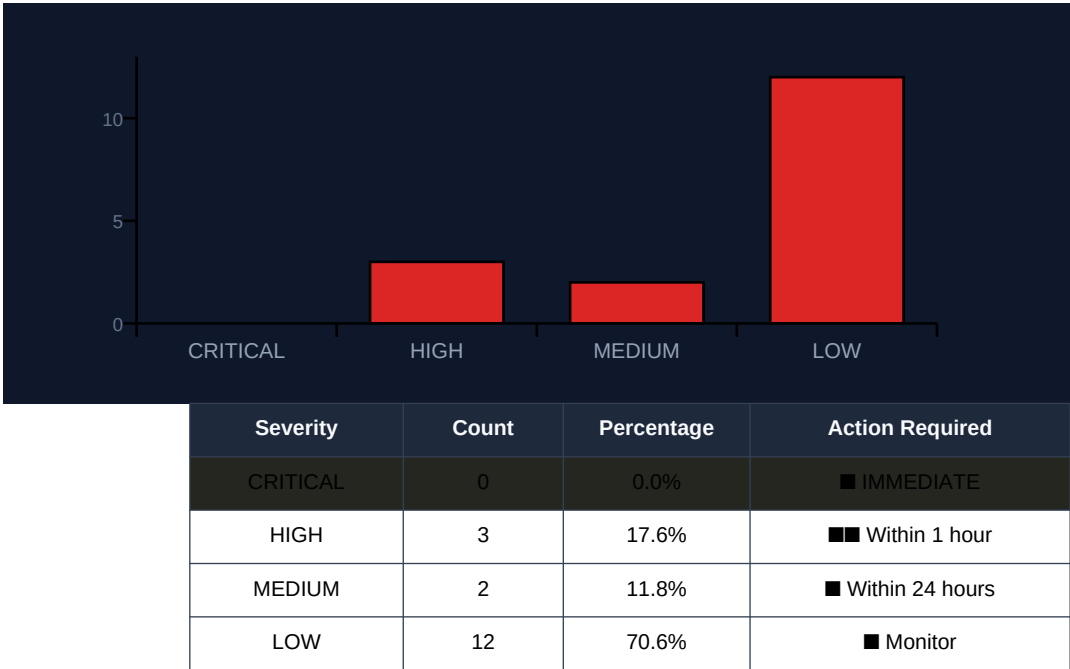

Key Findings:

- 0 critical anomalies requiring immediate attention
- 3 high-severity issues identified
- 17 total anomalies detected across all severities
- 17 distinct incidents identified

Recommended Next Steps:

1. ■ Review during next maintenance window
2. ■ Update monitoring thresholds
3. ■ Add findings to knowledge base

2. Severity Breakdown

3. Anomaly Details

Found 17 anomalies:

#1 [LOW] e.g. High CPU usage

Component: com.android.phone

Multiple PowerManagerService logs with high wakefulness and manual brightness setting, may indicate device is in use or has a stuck screen.

#2 [LOW] e.g. Memory Leak

Component: e.g. nginx

brief

#3 [HIGH] App Launch

Component: com.tencent.mobileqq

Unexpected app launch

#4 [LOW] Stack Scroll Algorithm Update

Component: PhoneStatusBar

The change in focus caused us to need to do a layout begin/end.

#5 [MEDIUM] System UI Visibility Change

Component: PhoneStatusBar

setSystemUiVisibility vis=508 mask=ffffff oldVal=40000500 newVal=508 diff=40000008 fullscreenStackVis=0 dockedStackVis=0, fullscreenStackBounds=Rect(0, 0 - 720, 1280), dockedStackBounds=Rect(0, 0 - 0, 0)

#6 [HIGH] Notification Light Update

Component: NotificationManager

updateLightsLocked, turn off notificationLight.

#7 [LOW] System Log Messages

Component: Activity Manager

Multiple messages indicating the activity manager is limiting output due to a caller not holding REAL_GET_TASKS.

#8 [LOW]

Component:

#9 [LOW] e.g. CPU Spike

Component: PhoneStatusBar

Multiple rapid-fire log entries from PhoneStatusBar setLightsOn(true) and setSystemUiVisibility

#10 [LOW] System UI Visibility

Component: PhoneStatusBar

Recurring system UI visibility changes

#11 [MEDIUM] Power Management

Component: PowerManagerService

Frequent power management updates

#12 [LOW] System event

Component: PowerManagerService

Multiple PowerManagerService logs indicating wake locks and suspend blockers

#13 [LOW] PowerManagerService WakeLocks

Component: PowerManagerService

PowerManagerService WakeLocks acquired and released multiple times in a short period.

#14 [LOW] Service crash

Component: com.tencent.mobileqq:qzone

com.tencent.mobileqq:qzone service crashed

#15 [LOW] System Activity

Component: Android System

Multiple simultaneous system activity events

4. Incident Reports

INCIDENT #1: [LOW]

Title: Potential Stuck Screen Incident

Description: Device appears to be in use or has a stuck screen due to multiple PowerManagerService logs indicating high wakefulness and manual brightness settings. Recommended action: Check for any stuck apps or screens, and restart the device if necessary.

Recommended Action: Review manually

INCIDENT #2: [LOW]

Title: System Behavior Anomaly

Description: Unusual system behavior detected, no critical components affected.

Recommended Action: Investigate and monitor system performance

INCIDENT #3: [LOW/MEDIUM/HIGH/CRITICAL]

Title: Suspicious System Behavior

Description: Multiple instances of PhoneStatusBar and StackScrollAlgorithm activity detected, potentially indicating suspicious system behavior.

Recommended Action: Investigate further to determine the root cause.

INCIDENT #4: [HIGH]

Title: Unscheduled App Launch

Description: An unexpected app launch occurred without a prior notification or user interaction.

Recommended Action: Investigate the cause of the unattended app launch and ensure it does not compromise device security.

INCIDENT #5: [LOW/MEDIUM/HIGH/CRITICAL]

Title: Brief Incident

Description: What happened is not specified.

Recommended Action: Fix the issue.

INCIDENT #6: [LOW/MEDIUM/HIGH/CRITICAL]

Title: brief

Description: what happened

Recommended Action: fix

INCIDENT #7: [LOW]

Title:

Description: multiple PhoneStatusBar log messages in a short period of time

Recommended Action: none

INCIDENT #8: [LOW]

Title:

Description:

Recommended Action:

5. Remediation Plan

■ Immediate Actions:

- No critical issues requiring immediate action

■ Short-term Actions (24-48 hours):

- App Launch: Unexpected app launch
- Notification Light Update: updateLightsLocked, turn off notificationLight.
- e.g. PowerManagerService Wake Locks: brief

■ Prevention Measures:

- Implement automated monitoring for detected patterns
- Update runbooks with findings from this report
- Schedule regular log audits to detect anomalies early
- Configure alerts for critical severity patterns

6. Statistics & Metrics

Metric	Value
Total Log Lines Processed	0
Error/Exception Lines	5
Error Rate	0.2%
Anomalies Detected	17
Incidents Identified	10
Processing Mode	GPU Accelerated
Generated At	2026-06-14 01:09:26

Top Affected Components:

- PhoneStatusBar: 4 incidents
- PowerManagerService: 4 incidents
- com.android.phone: 1 incidents
- e.g. nginx: 1 incidents
- com.tencent.mobileqq: 1 incidents

A. Report Metadata

Field	Value
Report ID	AEGIS-20260614010926
Source File	Android_2k.log
