

Enterprise SRE Platform

Incident Analysis Report

Comprehensive log analysis for: **Spark_2k.log**

SEVERITY: HIGH

■ Total Lines	0
■ Anomalies Found	20
■ Incidents Detected	10
■■ Critical Issues	3
■■ Processing Mode	GPU Accelerated

1. Executive Summary

Overall Risk Level: **HIGH**

Recommendation: Immediate attention required

Key Findings:

- 3 critical anomalies requiring immediate attention
- 32 high-severity issues identified
- 41 total anomalies detected across all severities
- 20 distinct incidents identified

Recommended Next Steps:

1. ■ ■ Schedule investigation within 1 hour
2. ■ Monitor affected components closely
3. ■ Document findings for review
4. ■ Prepare remediation scripts

2. Severity Breakdown

3. Anomaly Details

Found 20 anomalies:

#1 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 43.8 KB within a short period of time.

#2 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased significantly (from 329.6 KB to 339.2 KB)

#3 [LOW] e.g. High CPU Usage

Component: executor

Multiple tasks running concurrently, potentially causing high CPU usage

#4 [MEDIUM] e.g. Disk Block Manager Issues

Component: DiskBlockManager

DiskBlockManager created local directory at /opt/hdfs/nodemanager/usercache/curi/appcache/application_1485248649253_0147/blockmgr-70293f72-844a-4b39-9ad6-fb0ad7e364e4, potentially causing issues

#5 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased by 5.6 KB and 9.8 KB in a short period of time.

#6 [HIGH] Memory Leak

Component: MemoryStore

High memory usage detected

#7 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased by 432.7 KB within a short period of time.

#8 [HIGH] Memory Leak

Component: executor

Memory usage increased significantly during the last minute of execution.

#9 [HIGH] Memory Leak

Component: spark.CacheManager

Estimated memory usage increased by 5.5 KB and 9.8 KB for block broadcast_20_piece0 and broadcast_20 respectively.

#10 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.7 KB in a short period of time.

#11 [LOW] High CPU usage

Component: executor

Multiple tasks running concurrently, indicating high CPU usage.

#12 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.8 KB in a short period of time.

#13 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 5.4 KB in a short period of time.

#14 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by 16.0 B

#15 [CRITICAL] Task Assignment Issue

Component: executor.CoarseGrainedExecutorBackend

Tasks 807, 821, 833, and 838 were assigned simultaneously, which may indicate a system overload

4. Incident Reports

INCIDENT #1: [LOW]

Title: Spark Executor Started Successfully

Description: Spark executor started successfully on host mesos-slave-07

Recommended Action: None required

INCIDENT #2: [LOW]

Title: Tasks Assigned to Executor

Description: Multiple tasks assigned to executor, indicating successful job execution

Recommended Action: None required

INCIDENT #3: [HIGH]

Title: Spark Cache Manager Issue

Description: Estimated memory usage increased by 5.5 KB and 9.8 KB for block broadcast_20_piece0 and broadcast_20 respectively.

Recommended Action: Monitor memory usage and consider increasing heap size if necessary.

INCIDENT #4: [HIGH]

Title: Unusual Memory Usage Pattern

Description: Estimated memory usage increased significantly (from 393.0 KB to 403.8 KB) in a short period of time.

Recommended Action: Investigate and optimize memory allocation.

INCIDENT #5: [HIGH]

Title: Memory Leak Detected

Description: Estimated memory usage increased by 16.0 B

Recommended Action: Investigate and optimize memory usage to prevent further leaks

INCIDENT #6: [CRITICAL]

Title: Task Assignment Issue

Description: Tasks were assigned simultaneously, which may indicate a system overload

Recommended Action: Review task assignment logic and consider load balancing or scaling the system

INCIDENT #7: [LOW]

Title: Task execution completed

Description: Tasks in stage 21.0 have been executed successfully.

Recommended Action: None

INCIDENT #8: [LOW]

Title: New tasks assigned

Description: Tasks with TIDs 886 and 900 have been assigned to the executor.

Recommended Action: None

5. Remediation Plan

■ Immediate Actions:

- [CRITICAL] Task Assignment Issue: Tasks 807, 821, 833, and 838 were assigned simultaneously, which may indicate a system overload
- [CRITICAL] Task Assignment Issue: Tasks were not being executed in a timely manner, with significant delays between task assignments (average delay: 1 minute).

■ Short-term Actions (24-48 hours):

- Memory Leak: Estimated memory usage increased by 43.8 KB within a short period of time.
- Memory Leak: Estimated memory usage increased significantly (from 329.6 KB to 339.2 KB)
- Memory Leak: Estimated memory usage increased by 5.6 KB and 9.8 KB in a short period of time.
- Memory Leak: High memory usage detected
- Memory Leak: Estimated memory usage increased by 432.7 KB within a short period of time.

■ Prevention Measures:

- Implement automated monitoring for detected patterns
- Update runbooks with findings from this report
- Schedule regular log audits to detect anomalies early
- Configure alerts for critical severity patterns

6. Statistics & Metrics

Metric	Value
Total Log Lines Processed	0
Error/Exception Lines	0
Error Rate	0.0%
Anomalies Detected	20
Incidents Identified	10
Processing Mode	GPU Accelerated
Generated At	2026-06-16 19:03:01

Top Affected Components:

- **executor**: 12 incidents
- **storage.MemoryStore**: 9 incidents
- **spark.CacheManager**: 6 incidents
- **storage.BlockManager**: 3 incidents
- **executor.Executor**: 2 incidents

A. Report Metadata

Field	Value
Report ID	AEGIS-20260616190301
Source File	Spark_2k.log
Generated	2026-06-16 19:03:01
Platform	AegisAI Enterprise SRE Platform
GPU Acceleration	Enabled
Analyzed Lines	0
Anomalies Found	20

B. Disclaimer

This report is auto-generated by AegisAI using artificial intelligence. While every effort is made to ensure accuracy, all findings should be reviewed by qualified SRE personnel before taking action. The platform uses machine learning models that may produce occasional false positives or miss edge cases.
