## Incident Analysis Report

Comprehensive log analysis for: **Spark\_2k.log**

SEVERITY: HIGH

|                      |                 |
|----------------------|-----------------|
| ■ Total Lines        | 0               |
| ■ Anomalies Found    | 20              |
| ■ Incidents Detected | 10              |
| ■■ Critical Issues   | 2               |
| ■■ Processing Mode   | GPU Accelerated |

# 1. Executive Summary

Overall Risk Level: **HIGH**

**Recommendation:** Immediate attention required

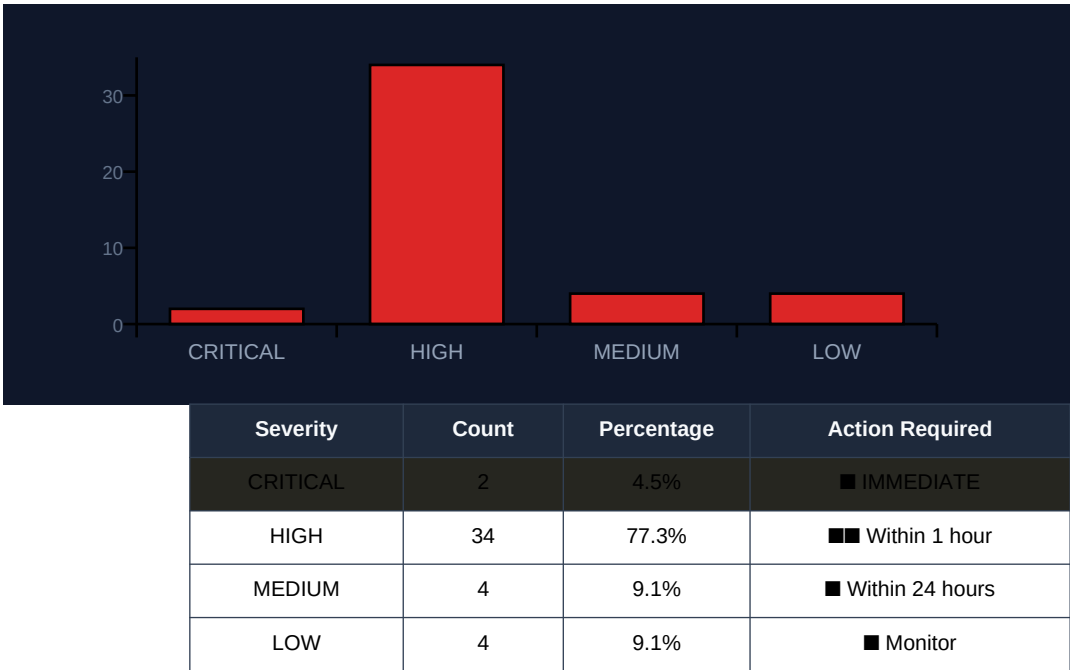

## Key Findings:

- 2 critical anomalies requiring immediate attention
- 34 high-severity issues identified
- 44 total anomalies detected across all severities
- 17 distinct incidents identified

## Recommended Next Steps:

1. ■ ■ Schedule investigation within 1 hour
2. ■ Monitor affected components closely
3. ■ Document findings for review
4. ■ Prepare remediation scripts

# 2. Severity Breakdown

# 3. Anomaly Details

Found 20 anomalies:

**#1 [HIGH] Memory Leak**

Component: MemoryStore

Estimated total memory usage is increasing over time.

**#2 [HIGH] Memory Leak**

Component: storage.MemoryStore

The system is running low on memory, with only 329.6 KB available.

**#3 [HIGH] Memory Leak**

Component: spark.CacheManager

Estimated memory usage increased by 5.6 KB in a short period of time.

**#4 [HIGH] Memory Leak**

Component: spark

Multiple instances of MemoryStore started with capacity 17.7 GB

**#5 [CRITICAL] Task Overload**

Component: executor

Got assigned task 0, 1, 2, 3 and 4 simultaneously

**#6 [LOW] High CPU usage**

Component: executor

Multiple tasks running concurrently with high CPU usage

**#7 [HIGH] Memory Leak**

Component: storage.MemoryStore

Estimated memory usage increased by 5.4 KB and free space decreased by 407.4 KB.

**#8 [CRITICAL] Task Execution Time Anomaly**

Component: executor.Executor

Tasks took significantly longer than expected (average time: 42, boot time: -101).

**#9 [HIGH] Memory Leak**

Component: spark

Estimated memory usage increased by 432.7 KB within a short period of time.

**#10 [HIGH] Memory Leak**

Component: memory

Estimated memory usage increased by 5.8 KB and 9.6 KB in a short period of time.

**#11 [HIGH] Memory Leak**

Component: spark.CacheManager

Estimated memory usage increased by 5.5 KB and 9.8 KB for block broadcast\_20\_piece0 and broadcast\_20 respectively.

**#12 [HIGH] Memory Leak**

Component: storage.MemoryStore

Estimated memory usage increased by 8.4 KB in the last minute.

**#13 [LOW] Unusual Block Manager Activity**

Component: BlockManager

Multiple blocks were found and stored in memory, which could indicate high memory usage or inefficient data processing.

**#14 [HIGH] Memory Leak**

Component: spark.CacheManager

Estimated memory usage increased significantly (from 393.0 KB to 403.8 KB)

#15 [HIGH] Memory Leak

Component: storage.MemoryStore

Estimated memory usage increased by approximately 5.8 KB in a short period of time.

## 4. Incident Reports

---

INCIDENT #1: [HIGH]

Title: Spark Cache Manager Issue

Description: The Spark Cache Manager experienced an unexpected increase in memory usage, which may indicate a memory leak. Immediate action is recommended to investigate and resolve the issue.

Recommended Action: Investigate and resolve the memory leak

---

INCIDENT #2: [LOW]

Title: Spark Executor Registration Issues

Description: Multiple instances of SecurityManager started with different permissions

Recommended Action: Verify Spark configuration

---

INCIDENT #3: [HIGH]

Title: Task Assignment Overload

Description: Got assigned multiple tasks simultaneously

Recommended Action: Optimize task assignment or increase executor resources

---

INCIDENT #4: [HIGH]

Title: Memory Leak Incident

Description: Estimated memory usage increased by 5.4 KB and free space decreased by 407.4 KB.

Recommended Action: Investigate and optimize memory usage.

---

INCIDENT #5: [CRITICAL]

Title: Task Execution Time Anomaly Incident

Description: Tasks took significantly longer than expected (average time: 42, boot time: -101).

Recommended Action: Investigate and optimize task execution times.

---

INCIDENT #6: [HIGH]

Title: Spark Job Execution Issue

Description: The Spark job execution experienced an unexpected increase in memory usage, which may indicate a memory leak.

Recommended Action: Investigate and optimize the memory usage of the Spark job.

---

INCIDENT #7: [HIGH]

Title: Spark Cache Manager Issue

Description: Estimated memory usage increased by 5.5 KB and 9.8 KB for block broadcast\_20\_piece0 and broadcast\_20 respectively.

Recommended Action: Monitor memory usage and consider increasing heap size if necessary.

---

INCIDENT #8: [HIGH]

Title: Memory Leak Incident

Description: A memory leak was detected, causing the estimated memory usage to increase significantly. This

may lead to performance issues and potential crashes if left unchecked.  
**Recommended Action:** Investigate and fix the root cause of the memory leak to prevent further degradation.

## 5. Remediation Plan

### ■ Immediate Actions:

- [CRITICAL] Task Overload: Got assigned task 0, 1, 2, 3 and 4 simultaneously
- [CRITICAL] Task Execution Time Anomaly: Tasks took significantly longer than expected (average time: 42, boot time: -101).

### ■ Short-term Actions (24-48 hours):

- Memory Leak: Estimated total memory usage is increasing over time.
- Memory Leak: The system is running low on memory, with only 329.6 KB available.
- Memory Leak: Estimated memory usage increased by 5.6 KB in a short period of time.
- Memory Leak: Multiple instances of MemoryStore started with capacity 17.7 GB
- Memory Leak: Estimated memory usage increased by 5.4 KB and free space decreased by 407.4 KB.

### ■ ■ Prevention Measures:

- Implement automated monitoring for detected patterns
- Update runbooks with findings from this report
- Schedule regular log audits to detect anomalies early
- Configure alerts for critical severity patterns

## 6. Statistics & Metrics

| Metric                    | Value               |
|---------------------------|---------------------|
| Total Log Lines Processed | 0                   |
| Error/Exception Lines     | 0                   |
| Error Rate                | 0.0%                |
| Anomalies Detected        | 20                  |
| Incidents Identified      | 10                  |
| Processing Mode           | GPU Accelerated     |
| Generated At              | 2026-06-16 19:03:46 |

### Top Affected Components:

- **executor:** 11 incidents

- **storage.MemoryStore**: 10 incidents
- **spark.CacheManager**: 6 incidents
- **spark**: 4 incidents
- **executor.Executor**: 2 incidents
